

SLIDE-LAG® REPLACEABLE PULLEY LAGGING

OVER 40% MORE
RUBBER, **"HUSKY"**
PADS OFFER LONGER
LIFE AND IMPROVED
TRACTION UNDER ALL
TYPES OF CONDITIONS.

SLIDE-LAG "HUSKY"

SLIDE-LAG "HUSKY" EDGE-CROWN

For many years, HOLZ has solved problems through engineered products and highly developed elastomeric compounds. To complete our fine line of replaceable pulley lagging products, HOLZ offers "HUSKY" Slide-Lag and "HUSKY" Edge-Crown Pads.

"HUSKY" Pads have over 40% more rubber than our standard Slide-Lag Pads offering longer life and improved traction under all types of conditions.

- **Extends Operating Life**

"HUSKY" provides the added thickness to extend the life of the pad. The proven abrasion resistant and high load bearing rubber compound insures optimum performance under the most severe abrasive conditions found in Sand & Gravel Plants, Rock Quarries, Open Pit Mining and Underground Mining.

- **Reduces Belt Slippage**

"HUSKY's" added thickness offers more flexibility which enhances the "gripping" action of the pad against the belt so vitally needed when moisture or ice build-up is present. No need to use softer rubber which will reduce load bearing qualities and abrasion resistance, our proven 60 Shore "A" Natural Rubber compound and our S-O-F Neoprene compound are used exclusively for "HUSKY".

Belt slippage has been significantly reduced in Grain Elevator Systems where heavy loads, moisture and cold weather greatly affect the performance of the conveyor.

- **Improves Belt Alignment**

Our "HUSKY" Edge-Crown Pads add a barrel-shaped crown to a flat faced pulley to aid in belt alignment, and offer the same added pad thickness to match our "HUSKY" Slide-Lag Pads. You now have a choice! Standard Pads for general duty service or "HUSKY" for severe duty service.

- **Meets Special Service Conditions**

"HUSKY" Slide-Lag and "HUSKY" Edge-Crown Pads are available in a variety of elastomers for "special" applications. Stainless Steel Backing Plates and Retainers are also available. Consult HOLZ Brochure PL 101 for material selections.

- **Why ask for the "Original" Slide-Lag Products?**

- Over 30 years of proven performance.
- All products are proudly made in the U.S.A.
- Four warehouse locations to service North America.
- Complete technical support toll free (800) 285-1600.
- A full line of products and elastomers to meet virtually every application.
