

Skrub-Kleen Scrubber Matting

**SPECIFY...HOLZ RUBBER SKRUB-KLEEN WASHING AND CUSHIONING MATS
FOR SUPERIOR PERFORMANCE IN ALL PROCESSING OPERATIONS.**

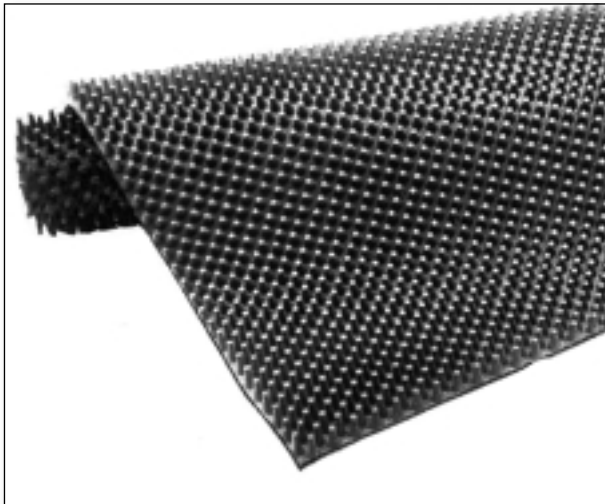

Figure 1

SKRUB-KLEEN MATTING IS DESIGNED FOR EXCEPTIONAL PERFORMANCE in fruit and vegetable washing operations to assist in removal of silt, soils and smaller foreign material. SKRUB-KLEEN is also used extensively to remove fruit and vegetable skins in peeling operations.

HOLZ RUBBER exclusive rubber compounding and range of nub designs provide gentle but effective gripping action while retaining resistance to abrasion and loss of nubs.

Scrubber matting can be used effectively for its cushioning effects on dump boards, harvester rolls and sacking stands to prevent bruising during handling of fruits and vegetables.

SKRUB-KLEEN is self-cleaning for extra performance and reduced maintenance attention. A special nub spacing has been incorporated to prevent the "channeling" found in symmetrical designs.

INSTALLATION

• Field Installation:

SKRUB-KLEEN can be field installed by stapling, nailing, riveting, screwing or bolting or cementing depending on the application and the material to which it is being attached.

• Factory Installation:

HOLZ RUBBER will wrap-apply SKRUB-KLEEN matting to rolls using either cold-pound or hot vulcanized methods. Application can be made to customer furnished rolls or supplied on rolls purchased to customer specifications. (Figure 2)

• On Belting:

SKRUB-KLEEN can be cold-bonded to many different types of conveyor belting to provide unusual conveying characteristics not normally available in the belting alone. (Figure 3) Possible applications are limitless— for example, nut harvester pickup belt, pineapple de-topping belts, vanner-like edges on belts to control spillage, and providing a non-marking gripping surface for handling fibre-board.

PRODUCT INFORMATION

MATS	STYLE NUMBER	PRODUCT DESCRIPTION	SIZE	DUROMETER (SHORE A, ± 5)	TYPE OF BACK	APPROXIMATE WEIGHT/EA.
	SM - 17-PB	1/2" high nubs 9 per square inch	20" x 24"	50	plain	4.2 lb.
SM - 17-FB	fabric				4.8 lb.	
ROLLS	SCM - 24-PB	1/2" high nubs 8 per square inch	20" x 24"	50	plain	6.1 lb.
	SCM - 24-FB				fabric	6.3 lb.
	LCM - 24-PB	1/2" high nubs 3-1/2 per square inch	20" x 24"	65	plain	5.2 lb.
	LCM - 24-FB				fabric	5.4 lb.
	XLM - 24-PB	1-3/16" high nubs 8 per square inch	20" x 24"	55	plain	8.0 lb.
	XLM - 24-FB				fabric	8.2 lb.
	SCR - 1-PB	1/2" high nubs 8 per square inch	① 4" x 50'	50	plain	23.0 lb.
	SCR - 1-FB				fabric	26.0 lb.
LCR - 1-PB	1/2" high nubs 3-1/2 per square inch	① 4" x 50'	65	plain	22.8 lb.	
LCR - 1-FB				fabric	29.0 lb.	
ADDITIONAL INFORMATION		SPECIAL CONSTRUCTIONS, COMPOUNDS			NOTES:	
Standard Construction		Black, meets FDA standards.			① Also available in multiples of 4" up through 20" wide.	
Special Construction		Available on request in a full range of color, durometers and compounds.
