

# Stubby Nob

## Conveyor & Elevator Pulley Lagging

Increased Traction • Self-Cleaning • Durable

**HOLZ STUBBY-NOB PULLEY LAGGING** provides superior performance in light duty conveying and elevating operations. Specifically designed nubs increase the co-efficient of friction between the belt and pulley, allowing lower take-up tension and longer belt and fastener service life. This exclusive Stubby-Nob design means continued driving action as the nubs wear, compared to the shorter useful life of "rough top lagging."

Quality elastomers provide long life under varied conditions. Special compounds are available to provide traction in unusual service.

The flexing motion of the stepped nub design has proven very successful on agricultural machinery where heavy material build-up problems exist. Stubby-Nob is also very effective when used on pulleys driving wire mesh sizing screens.

### PROFILE OF DESIGN (FULL SIZE)

5 Nubs Per Square Inch

### ADDITIONAL INFORMATION

Standard Construction	<ul style="list-style-type: none"> <li>· 65 durometer ± 5 Shore A</li> <li>· Black, SBR, FDA acceptable</li> </ul>
Special Construction	Many other colors, compounds and durometers may be available for special service conditions.

### CONVEYOR ACCESSORIES FROM HOLZ RUBBER

- Pulley Lagging
- Roll Covering
- Shaker Screen Protector
- Idler Rolls
- Belting Attachments
- Screen Balls
- Rubber Pulleys

### PRODUCT INFORMATION

STYLE NO.	SIZE	TYPE OF BACK	APPROX. WEIGHT PER SQ. FT. (LBS.)
PL-1-PB	3-1/2" x 19-1/2"	Rubber	0.6
PL-1-FB		Fabric	0.8
PL-7-PB	7" x 19-1/2"	Rubber	1.2
PL-7-FB		Fabric	1.6
PL-10-PB	10-1/2" x 19-1/2"	Rubber	1.8
PL-10-FB		Fabric	2.4
PL-14-PB	14" x 19-1/2"	Rubber	2.5
PL-14-FB		Fabric	3.2
PLR-1-PB	3-1/2" x 50'	Rubber	18
PLR-1-FB		Fabric	23
PLR-2-PB	7" x 50'	Rubber	37
PLR-2-FB		Fabric	46
PLR-3-PB	10-1/2" x 50'	Rubber	56
PLR-3-FB		Fabric	69
PLR-4-PB	14" x 50'	Rubber	77
PLR-4-FB		Fabric	92
